### Overview of the Methodology

Missoula County and the City of Missoula conducted a Community Survey from October through December of 2010. The purpose of the survey was to help establish priorities for the future development of parks and recreation facilities, programs and services within Missoula County and the City of Missoula. The survey was designed to obtain statistically valid results from households throughout Missoula County and the City of Missoula. The survey was administered by a combination of mail and phone.

Leisure Vision worked extensively with Missoula County and City of Missoula officials, as well as members of the PROS Consulting team, in the development of the survey questionnaire. This work allowed the survey to be tailored to issues of strategic importance to effectively plan the future system.

Leisure Vision mailed surveys to a random sample of 3,500 households throughout Missoula County and the City of Missoula. Approximately three days after the surveys were mailed, each household that received a survey also received an automated voice message encouraging them to complete the survey. In addition, about two weeks after the surveys were mailed Leisure Vision began contacting households by phone. Those who indicated they had not returned the survey were given the option of completing it by phone.

The goal was to obtain a total of at least 766 completed surveys, with at least 385 from residents living in Missoula County but outside of the City Missoula, and at least 381 from residents living in the City of Missoula. These goals were far exceeded, with a total of 1,107 surveys having been completed, including 453 from residents living in Missoula County but outside of the City Missoula, and 654 from residents living in the City of Missoula. The results of the random sample of 1,107 households have a 95% level of confidence with a precision of at least +/-2.9%.

The following pages summarize major survey findings.

## Major Survey Findings

## **Missoula County and City of Missoula**

### *“Drilling Down Management Report”*

Prepared by  
Ronald A. Vine, President  
Leisure Vision

## **Introduction**

The Community Survey for Missoula County and the City of Missoula provided extensive information regarding current usage, satisfaction, most used, most important facilities and programs, and priority funding for parks and recreation services.

This “Drilling Down Management Report” has been developed to provide a more in depth picture of the survey responses, including information from the extensive database of national parks and recreation usage trends developed by Leisure Vision (a division of ETC Institute).

Specifically, the “Drilling Down Management Report” includes the following three (3) analysis tools:

- 1) Survey analysis based on demographic subsets of overall findings, i.e. citizen responses based on household composition, (households with and without children), responses by males and females, and amount willing to pay to acquire open space and construct new trails and facilities.
- 2) Survey analysis compared to Leisure Vision’s database of over 600 parks and recreation surveys in 46 states.
- 3) Survey analysis based on the “Drilling Down Management Report”. Ron Vine, President and founder of Leisure Vision, has served as the project manager for over 90% of the parks and recreation surveys conducted by Leisure Vision, including more than 200 surveys for parks and recreation master plans. Dr. Elaine Tatham has served as the research director on all of the survey reports. Mr. Vine also has over 30 years experience in the Parks and Recreation field including both field experience and research/consulting experience. He holds a Master’s Degree in Parks and Recreation Administration from the University of Illinois.

**Major Survey Findings**

**County Parks or Trails That Were Visited**

- Overall visitation of County parks or trails (76%) is slightly higher than the national average of 72%. Overall visitation of City parks or trails (86%) is considerably higher than the national benchmark of 72%. All households with children are the biggest visitors to City and County parks or trails.

**Rankings of Very Satisfied or Somewhat Satisfied With Maintenance**

- Both City and County parks and trails have high satisfaction. Eighty-nine percent (89%) of all respondents are very or somewhat satisfied with the maintenance of County parks or trails, and 89% of households are very or somewhat satisfied with the maintenance of City parks or trails they have visited.

<b>Household Type</b>	<b>County Parks Only</b>	<b>City Parks Only</b>
<b>Very Satisfied</b>	<b>46%</b>	<b>49%</b>
<b>Somewhat Satisfied</b>	<b>43%</b>	<b>40%</b>

**Facilities That Are Used the Most by All Resident Willing to Pay To Acquire Open Space and Construct New Trails and Facilities**

- Hiking trails (50%) is the facility that households use the most. Playgrounds (25%) are next, followed by river access (24%), paved commuter trails (23%), and pool/water parks (19%).
- Fully 74% of households who are willing to pay \$50 or more to acquire open space and construct new trails and facilities used hiking trails the most. In comparison, only 36% of households who are not willing to pay any money to pay to acquire open space and construct new trails and facilities use hiking trails the most. Clearly hiking trails have a big impact on the level of voter support.

### Reasons Preventing You from Using Facilities or Programs

- In 3 out of 4 types of households, “too busy” was the biggest reason preventing household from using facilities or programs more. In 2 out of 4 types of households, “too far from home” was the 2<sup>nd</sup> biggest reason preventing household from using facilities or programs more. “Use other state and federal lands” was significantly less of a barrier for households with children under 10 than other types of households.

### Programs That Are Used the Most by Household Type

- The type of household has a big impact on what programs are used the most. Youth sports are the most used program for households with children under age 10, and the second most used program for households with children ages 10-19. However, youth programs were not in the top 5 for adult-only households.
- The only program that is in the top 5 most used programs for all household types are special events. Adult fitness is in the top 5 most used program in all household types except households with children only 10 and under. All other program types are listed in only 2 or less household types.

Ways to Learn About City and County Programs, Parks, and Facilities

- Newspaper, from friend and neighbors, park guides and brochures, and radio were ranked among the five most frequently used marketing sources for all household types. The park website was ranked among the five most frequently used marketing sources for all households types except those with ages 55 or older. At 34%, the use of websites is significantly higher than the national benchmark, while the use of program guides is significantly lower than the national benchmark.

*Section 6 – All Residents:  
Survey Instrument*

---

*A Few Minutes of Your Time Will Help Make Missoula County and the City of Missoula  
a Better Place to Live, Work and Play!*

Dear Resident::

*Your response to the enclosed survey is extremely important...*

Missoula County and the City of Missoula are conducting a Community Survey to help establish priorities for the future improvement of parks and recreation facilities, programs and services within your community. Your household was one of a limited number selected at random to receive this survey; therefore, it is very important that you participate.

*We appreciate your time...*

We realize that this survey will take approximately 10-15 minutes to complete, but each question is important. The time you invest in completing this survey will aid Missoula County and the City of Missoula in taking a resident-driven approach to making decisions that will enrich the future of our communities and positively affect the lives of its residents.

*Please complete and return your survey within the next two weeks...*

We have selected Leisure Vision/ETC Institute, an independent consulting company, as our partner to administer this survey. They will compile the data received and present the results to Missoula County and the City of Missoula. **Your responses will remain confidential.** Please return your completed survey in the enclosed postage-paid envelope addressed to ETC Institute, 725 W. Frontier Circle, Olathe, KS 66061.

For the purposes of this survey, County parks and trails are defined as those located OUTSIDE the limits of the City of Missoula. City parks and trails are located INSIDE limits of the City of Missoula.

If you have any questions, please feel free to contact Lisa Moisey, County Parks and Trails Manager with Missoula County at 258-3432. For more information about Missoula County Parks and this planning process, visit our website <http://www.co.missoula.mt.us/rural/parks.htm>. For information about City of Missoula Parks and Recreation, visit their website at <http://www.ci.missoula.mt.us/index.aspx?nid=157>.

The Community Survey is a tool that will benefit all residents. Please take this opportunity to let your voice be heard!

Sincerely,

Lisa Moisey, Parks and Trails Manager  
Missoula County

Donna Gaukler, Director  
City of Missoula Parks and Recreation

**Missoula County Interest and Opinion Survey: *Let your voice be heard today!***
