BACKGROUND

The 54,000 acre Cascade-Siskiyou National Monument was created in 2000 in recognition of its location at the crossroads of the Cascade, Klamath, and Siskiyou mountains which contain a remarkable variety of species in a small area. It was the first national monument established solely to protect biodiversity. Located in Jackson County, Oregon the monument is managed by the Bureau of Land Management.

PUBLIC ACCESS AND USE OF THE MONUMENT

The monument allows access to in-holdings, existing rights-of-way, grazing, and hunting and fishing. Cascade-Siskiyou provides a wide diversity of recreation opportunities such as hiking, camping, fishing, horseback riding, cycling, and winter sports.

TRAVEL AND TOURISM

Travel and tourism is important to communities in Jackson County, representing about 18% of total private wage and salary employment, or 13,064 jobs, in 2008. In Oregon, the Outdoor Industry Foundation reports that recreation contributes more than \$5.8 billion annually to the state's economy.⁶

SUMMARY FINDINGS

Research shows that conserving public lands like the Cascade-Siskiyou National Monument helps to safeguard and highlight amenities that draw new residents, tourists, and businesses to surrounding communities.¹

Western counties with protected public lands, like national monuments, have been more successful at attracting fast-growing economic sectors and as a result grow more quickly, on average, than counties without protected public lands.² In addition, protected natural amenities—such as the pristine scenery found at Cascade-Siskiyou—also help sustain property values and attract new investment.³

ECONOMY GROWS AFTER DESIGNATION

The communities in Jackson County, Oregon neighboring the Cascade-Siskiyou National Monument experienced strong growth after the 2000 designation of the monument, continuing previous growth trends.

From 2000 to 2008, in Jackson County:⁴

- Population grew by 10%
- Real personal income grew by 19%
- Jobs grew by 16%
- Real per capita income grew by 8%

SERVICES JOBS INCREASING ACROSS THE BOARD

Services jobs—such as doctors, engineers, and teachers—account for the majority of employment growth in Jackson County in recent decades. These jobs are increasingly mobile, and many entrepreneurs locate their businesses in areas with a high quality of life.

From 2000 to 2008, in Jackson County:⁵

- Services grew from 69,561 to 85,981 jobs, a 24% increase
- Non-Services grew from 21,863 to 22,102 jobs, a 1% increase

THE COMMUNITIES IN JACKSON COUNTY NEIGHBORING THE CASCADE-SISKIYOU NATIONAL MONUMENT EXPERIENCED STRONG GROWTH SINCE ITS DESIGNATION IN 2000.

THE INCREASES IN POPULATION, JOBS, PERSONAL INCOME, AND PER CAPITA INCOME ALSO MIRROR OTHER WESTERN COUNTIES WITH NATIONAL MONUMENTS OR OTHER PROTECTED LANDS.

METHODOLOGY

This fact sheet is part of a series that assesses the economic performance of local communities that are adjacent to national monuments. The series examines national monuments in the eleven western continental states that are larger than 10,000 acres and were created in 1982 or later.

Series: [The Economic Importance of National Monuments](#)

NON-LABOR INCOME GROWS FASTEST

One of the largest and fastest growing sources of new personal income in the Jackson County is non-labor income, which is made up of investment income such as dividends, interest and rent, and government transfer payments such as Social Security and Medicare.

For people with investment income and many retirees, protected public lands and recreation provide important aspects of a high quality of life. Non-labor income already represents more than a third of all personal income in the West—and will grow as the Baby Boomer generation retires.⁷

From 2000 to 2008, in Jackson County:

- Non-Labor income grew from \$2.4 billion to \$3.1 billion, a 25% increase
- As a result, in 2008 non-labor income made up 44% of total personal income

TRADITIONAL JOBS HOLD STEADY

Long before the monument's creation, commodity industries (agriculture, mining, timber) were becoming a smaller share of the overall economy in Jackson County. These industries remain part of the region's economy today.

In 2008, in Jackson County:

- Agriculture accounted for 2% of total employment
- Mining accounted for just more than 0.2% of total private employment
- Timber accounted for almost 5% of total private employment

PROSPERITY ON THE RISE

As the economy has grown since designation of the Cascade-Siskiyou National Monument, per capita income has risen as well. This indicates growing prosperity in the region.

From 2000 to 2008, in Jackson County:

- Real per capita income grew from \$32,363 to \$34,947, an 8% increase

4 All economic data comes from U.S. Department of Commerce. 2010. Bureau of Economic Analysis, Regional Economic Information System, Washington, D.C.; U.S. Department of Commerce. 2010. Census Bureau, County Business Patterns, Washington, D.C.

5 The U.S. Department of Commerce changed with way it classifies industries between 2000 and 2001. To show a continuous timeline for services and non-services employment we subtracted non-services jobs from total private employment to derive services jobs. The national recession from March-November 2001 also may account for short-term employment volatility around 2001.
