Grand Canyon-Parashant National Monument
A Summary of Economic Performance in the Surrounding Communities

BACKGROUND
The 1,017,000 acre Grand Canyon-Parashant National Monument was designated in 2000 to protect the area’s expansive landscape located at the junction of the Colorado Plateau, the Mohave Desert, and the Great Basin. Located in Mohave County, Arizona and adjacent to Washington County, Utah the monument is co-managed by the Bureau of Land Management and the National Park Service.

PUBLIC ACCESS AND USE OF THE MONUMENT
The Grand Canyon-Parashant’s unique landscape each year attracts thousands of visitors, and the monument is accessible for hunting, fishing, and motorized travel on roads, along with hiking and camping.

TRAVEL AND TOURISM
Travel and tourism are important to communities in the Grand Canyon-Parashant Region, representing about 22% of total private wage and salary employment, or 19,310 jobs, in 2015. In Arizona and Utah, the Outdoor Industry Association reports that recreation contributes more than $10 billion annually to each state’s economy.

SUMMARY FINDINGS
Research shows that conserving public lands like the Grand Canyon-Parashant National Monument helps to safeguard and highlight amenities that draw new residents, tourists, and businesses to surrounding communities.

Western counties with protected public lands, like national monuments, have been more successful at attracting fast-growing economic sectors and as a result grow more quickly, on average, than counties without protected public lands. In addition, protected natural amenities—such as the pristine scenery found at Grand Canyon-Parashant—also help sustain property values and attract new investment.

ECONOMY GROWS AFTER DESIGNATION
The communities in Mohave County, Arizona and Washington County, Utah neighboring the Grand Canyon-Parashant National Monument (the Grand Canyon-Parashant Region) experienced strong growth after the designation of the monument, continuing previous growth trends.

From 2001 to 2015, in the Grand Canyon-Parashant Region:
- Population grew by 41%
- Jobs grew by 42%
- Real personal income grew by 59%
- Real per capita income grew by 12%

SERVICES JOBS INCREASING ACROSS THE BOARD
Services jobs—such as doctors, engineers, and teachers—account for the majority of employment growth in the Grand Canyon-Parashant Region in recent decades. These jobs are increasingly mobile, and many entrepreneurs locate their businesses in areas with a high quality of life.

From 2001 to 2015, in the Grand Canyon-Parashant Region:
- Services grew from 74,364 to 115,701 jobs, a 56% increase
- Non-Services held steady from 20,334 to 20,305 jobs, a minimal change
**THE COMMUNITIES NEIGHBORING THE NATIONAL MONUMENT IN MOHAVE AND WASHINGTON COUNTIES EXPERIENCED STRONG GROWTH SINCE ITS DESIGNATION IN 2000.**

**THE INCREASES IN POPULATION, JOBS, PERSONAL INCOME, AND PER CAPITA INCOME ALSO MIRROR OTHER WESTERN COUNTIES WITH NATIONAL MONUMENTS OR OTHER PROTECTED LANDS.**

**METHODOLOGY**

This fact sheet is part of a series that assesses the economic performance of local communities that are adjacent to national monuments. The series examines national monuments in the eleven western continental states that are larger than 10,000 acres and were created in 1982 or later.

Series: The Economic Importance of National Monuments to Local Communities

---

**NON-LABOR INCOME GROWS FASTEST**

One of the largest and fastest growing sources of new personal income in the Grand Canyon-Parashant Region is non-labor income, which is made up of investment income such as dividends, interest and rent, and government transfer payments such as Social Security and Medicare.

For people with investment income and many retirees, protected public lands and recreation provide important aspects of a high quality of life. Non-labor income already represents more than a third of all personal income in the West—and will grow as the Baby Boomer generation retires.7

From 2001 to 2015, in the Grand Canyon-Parashant Region:

- Non-labor income grew from $3 billion to $5.5 billion, an 84% increase
- As a result, in 2015 non-labor income made up 50% of total personal income

**TRADITIONAL JOBS HOLD STEADY**

Long before the monument’s creation, commodity industries (agriculture, mining, timber) in the Grand Canyon-Parashant Region were small relative to the overall economy. These industries remain part of the region’s economy today.

In 2015, in the Grand Canyon-Parashant Region:

- Agriculture accounted for 1% of total employment
- Mining accounted for 0.2% of total private employment
- Timber accounted for 0.3% of total private employment

**PROSPERITY ON THE RISE**

As the economy has grown since designation of the Grand Canyon-Parashant National Monument, per capita income has risen as well. This indicates growing prosperity in the region.

From 2001 to 2015, in the Grand Canyon-Parashant Region:

- Real per capita income grew from $27,324 to $30,703, a 12% increase

---

5 The U.S. Department of Commerce changed the way it classifies industries between 2000 and 2001. To show a continuous timeline for services and non-services employment, we subtracted non-services jobs from total private employment to derive services jobs.
