A SocioEconomic Profile

Rio Arriba County, New Mexico, Dixon CCD

Produced by the
Economic Profile System Community (EPSC)
April 6, 2007

About The Economic Profile System Community (EPSC)

This profile was produced using the Economic Profile System Community (EPSC). EPSC is designed to allow users to automatically and efficiently produce detailed socioeconomic profiles at a variety of geographic scales using the spreadsheet program Microsoft Excel.

Profiles contain tables and figures that illustrate long-term trends in population; employment and personal income by industry; average earnings; business development; retirement and other non-labor income; commuting patterns; agriculture; and earnings by industry.

Databases used for EPSC profiles are from the Bureau of the Census. See the companion product (EPS) to run profiles from additional data sources.

EPS was developed in partnership with the Bureau of Land Management by Ray Rasker, Jeff van den Noort, Ben Alexander and Patty Gude when they were employees of the Sonoran Institute, and continues to be refined and improved by these authors under the auspices of their new organization, Headwaters Economics.

EPS is available for free download from Headwaters Economics (www.headwaterseconomics.org).

For technical questions about EPSC, contact Jeff van den Noort at jeff@headwaterseconomics.org.

www.headwaterseconomics.org

Headwaters Economics conducts social science research to understand demographic and socioeconomic trends and their impacts on changing land use patterns. We use this knowledge to assist individuals, organizations and communities to benefit from their competitive advantages.

www.blm.gov

The Bureau of Land Management (BLM), an agency within the U.S. Department of the Interior, administers 262 million surface acres of America's public lands, located primarily in 12 Western States. The BLM sustains the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

www.sonoran.org

The Sonoran Institute promotes community decisions that respect the land and people of the West. Working with communities since 1990, we believe people make the best decisions about their future when they look at the big picture, work collaboratively and create practical, local solutions. The Institute encourages public participation, civil dialogue and practical solutions that benefit each community as a whole. We believe informed and engaged citizens boost the resilience of a community's economic and natural systems.

Methods		
Glossary		

Note: The data for this profile is from the U.S. Bureau of the Census, files SF1 and SF3. SF1 represents that data that was collected from the short Census form, which was sent to 100% of the population, but only contains the basic Census information. SF3 represents the more detailed data that was collected from the long form, which was only sent to a portion of the total population. Most of the detailed information in this report is from the SF3. We always retrieved the data from SF1 whenever possible because it is more accurate. Each table in this profile contains a footnote indicating where (SF1 or SF3) the data came from, including the table number. See the methods section at the end of the profile for more information.

Age Breakout in 2000

- The median age in 2000 is 42.9 years.

- In 2000, the baby boom was aged 40 - 55.

- The largest age category is 50 to 54 years old (141 people or 9.4% of the total).

- The population density is 22 people per square mile (excluding water).

Population by Age and Sex							
	F / M Split	Female		Male		Total	
Total	51% / 49%	768	100%	737	100%	1,505	100%
Under 20 years	53% / 47%	175	23%	156	21%	331	22%
65 years and over	56% / 44%	123	16%	97	13%	220	15%
Median Age		43.4		42.2		42.9	

Universe: Total population

Table SF1 - P12

Race

- Race and Ethnicity are broken out separately. The Ethnicity breakout is separate because Hispanics can be of any race.

Total Population by Race		% of Total	
White	1,046	69.5%	
Black or African American	3	0.2%	
American Indian & Alaska Native	35	2.3%	
Asian	0	0.0%	
Native Hawaiian & Other Pacific Islander	0	0.0%	
Some other race	370	24.6%	
Two or more races	51	3.4%	

Universe: Total population

Table SF1 - P7

- The largest number of residents are "White" (69.5%).
- The second largest group of residents are "Some other race" (24.6%).

2000 Race Breakout

Ethnicity

- 69.8% of the population is Hispanic or Latino (of any race).
- Of Hispanic or Latino people, the largest number are "White alone" (60.3% of the Hispanic population).

Hispanic Population by Race in 2000		% of Total	% of Hispanic
Hispanic or Latino (of any race)	1,050	69.8%	100.0%
White alone	633	42.1%	60.3%
Black or African American alone	-	0.0%	0.0%
American Indian and Alaska Native alone	16	1.1%	1.5%
Asian alone	-	0.0%	0.0%
Native Hawaiian and Other Pacific Islander alone	-	0.0%	0.0%
Some other race alone	367	24.4%	35.0%
Two or more races	34	2.3%	3.2%
Not Hispanic or Latino	455	30.2%	
Total:	1,505	100.0%	

Universe: Total population

Table SF1 - P8

- Of Hispanic or Latino people, the second largest number are "Some other race alone" (35.0% of the Hispanic population).

Hispanic by Race

Housing

- 87.6% of the housing units are occupied.
- 76.2% of the housing units are owner occupied or for sale.
- 12.0% of the housing units are renter occupied or for rent.
- 3.2% of the housing units are vacant units for seasonal, recreational, or occasional use.

Housing in 2000		% of Total	
Total Housing Units	753		
Universe: Housing units SF1 - H1			
Occupied	660	87.6%	
Vacant Units - Total	93		
Vacancy Rate (%)	12.4%		
Average Household Size	2.3		
Universe: Housing units SF1 - H3, H12			
Owner Occupied Units		% of Total	
Owner Occupied	572	76.0%	
Vacant Units - For Sale Only	2		
Homeowner Vacancy Rate (%)	0.3%		
Average Household Size	2.3		
Universe: Occupied housing units SF1 - H4, H5 & H12			
Rental Units		% of Total	
Renter Occupied	88	11.7%	
Vacant Units - For Rent	2		
Rental Vacancy Rate (%)	2.2%		
Average Household Size	1.9		
Universe: Occupied housing units SF1 - H4, H5 & H12			
Vacant Units		% of Total	
For rent	2	0.3%	
For sale only	2	0.3%	
Rented or sold, not occupied	1	0.1%	
For seasonal, recreational, or occasional use	24	3.2%	
For migrant workers	-	0.0%	
Other vacant	64	8.5%	
Total Vacant	93	12.4%	
Universe: Vacant housing units SF1 - H5			

Home Construction

- The largest number of houses were built 1990 to march 2000 *.

* Note: This ranking is based on time periods of different lengths. The most recent time period spans 10 years and 3 months.

Home Construction by Decade

Universe: Occupied housing units

SF3 - H36

Housing Affordability - Rentals

- 24% of the median household income was paid in gross rent (incl. utilities).

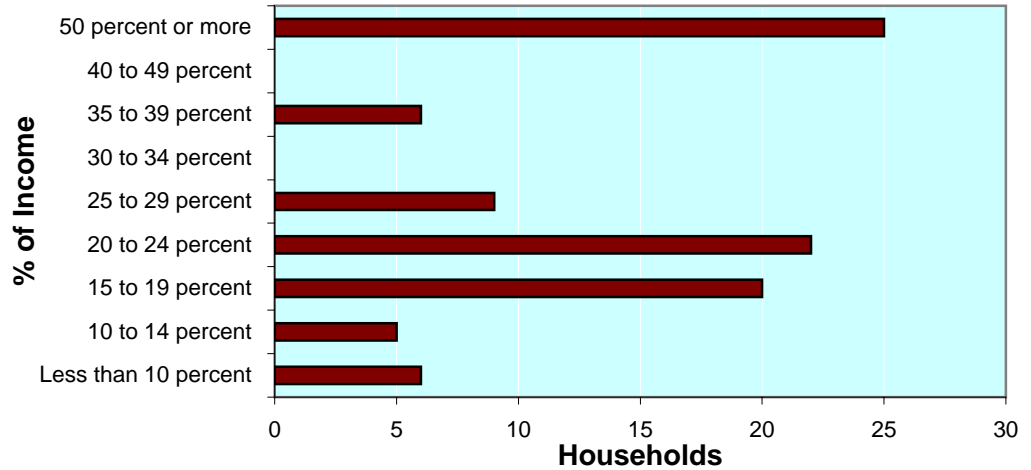

Rental Affordability

Median gross rent	\$	430
Median gross rent as a percentage of household income in 1999		24%

Universe: Specified renter-occupied housing units paying cash rent SF3 - H63

Households by Percent of Household Income Paid to Rent

- 23% of the households that pay rent, spend more than 50% of their household income in gross rent (incl. utilities).

Universe: Specified renter-occupied housing units

SF3 - H69

Housing Affordability - Owner Occupied

- The housing affordability index is 93, which suggests that the median family can not afford the median house*.

Owner Occupied Housing Affordability

		2000
Specified owner-occupied housing units: Median value (Adjusted for Inflation)	\$	123,000
% of median income necessary to buy the median house		27%
Income required to qualify for the median house	\$	34,756
Housing Affordability Index: (100 or above means that the median family can afford the median house.)*		93

Universe: Specified owner-occupied housing units

SF3 - H76

Income in:

		1999
Per capita income	\$	15,084
Median household income	\$	25,987
Median family income	\$	32,386

Universe: Total population, Households, Families

SF3 - P82,P53,P77

* Note: The housing affordability figures assume a 20% down payment and that no more than 25% of a family's income goes to paying the mortgage. It is based on an interest rate of 10.01% in 1990 and 8.03% in 2000. Use this statistic as a comparative, rather than absolute, measure.

<http://www.census.gov/Press-Release/www/2002/sf3compnote.html>

Comparing SF 3 Estimates with Corresponding Values in SF 1 and SF 2

As in earlier censuses, the responses from the sample of households reporting on long forms must be weighted to reflect the entire population. Specifically, each responding household represents, on average, six or seven other households who reported using short forms.

One consequence of the weighting procedures is that each estimate based on the long form responses has an associated confidence interval. These confidence intervals are wider (as a percentage of the estimate) for geographic areas with smaller populations and for characteristics that occur less frequently in the area being examined (such as the proportion of people in poverty in a middle-income neighborhood).

In order to release as much useful information as possible, statisticians must balance a number of factors. In particular, for Census 2000, the Bureau of the Census created weighting areas --geographic areas from which about two hundred or more long forms were completed-- which are large enough to produce good quality estimates. If smaller weighting areas had been used, the confidence intervals around the estimates would have been significantly wider, rendering many estimates less useful due to their lower reliability.

The disadvantage of using weighting areas this large is that, for smaller geographic areas within them, the estimates of characteristics that are also reported on the short form will not match the counts reported in SF 1 or SF 2. Examples of these characteristics are the total number of people, the number of people reporting specific racial categories, and the number of housing units. The official values for items reported on the short form come from SF 1 and SF 2.

The differences between the long form estimates in SF 3 and values in SF 1 or SF 2 are particularly noticeable for the smallest places, tracts, and block groups. The long form estimates of total population and total housing units in SF 3 will, however, match the SF 1 and SF 2 counts for larger geographic areas such as counties and states, and will be essentially the same for medium and large cities.

This phenomenon also occurred for the 1990 Census, although in that case, the weighting areas included relatively small places. As a result, the long form estimates matched the short form counts for those places, but the confidence intervals around the estimates of characteristics collected only on the long form were often significantly wider (as a percentage of the estimate).

SF 1 gives exact numbers even for very small groups and areas, whereas SF 3 gives estimates for small groups and areas such as tracts and small places that are less exact. The goal of SF 3 is to identify large differences among areas or large changes over time. Estimates for small areas and small population groups often do exhibit large changes from one census to the next, so having the capability to measure them is worthwhile.

Detailed documentation about the 2000 Census is available in two large Acrobat .pdf files from the Census Website:

Following are some excerpts from the sf3.pdf file regarding income (copied from page 1023 of sf3.pdf)

INCOME IN 1999

The data on income in 1999 were derived from answers to long-form questionnaire Items 31 and 32, which were asked of a sample of the population 15 years old and over. "Total income" is the sum of the amounts reported separately for wage or salary income; net self-employment income; interest, dividends, or net rental or royalty income or income from estates and trusts; social security or railroad retirement income; Supplemental Security Income (SSI); public assistance or welfare payments; retirement, survivor, or disability pensions; and all other income.

"Earnings" are defined as the sum of wage or salary income and net income from selfemployment.

"Earnings" represent the amount of income received regularly for people 16 years old and over before deductions for personal income taxes, social security, bond purchases, union dues, medicare deductions, etc.

Receipts from the following sources are not included as income: capital gains, money received from the sale of property (unless the recipient was engaged in the business of selling such property); the value of income "in kind" from food stamps, public housing subsidies, medical care, employer contributions for individuals, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; and gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Income Type in 1999

The eight types of income reported in the census are defined as follows:

1. Wage or salary income. Wage or salary income includes total money earnings received for work performed as an employee during the calendar year 1999. It includes wages, salary, armed forces pay, commissions, tips, piece-rate payments, and cash bonuses earned before deductions were made for taxes, bonds, pensions, union dues, etc.

2. Self-employment income. Self-employment income includes both farm and nonfarm self-employment income. *Nonfarm self-employment income* includes net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc. *Farm self-employment income* includes net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his or her own account, as an owner, renter, or sharecropper. Gross receipts include the value of all products sold, government farm programs, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc. Operating expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farmhands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not state and federal personal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income.

3. Interest, dividends, or net rental income. Interest, dividends, or net rental income includes interest on savings or bonds, dividends from stockholdings or membership in associations, net income from rental of property to others and receipts from boarders or lodgers, net royalties, and periodic payments from an estate or trust fund.

4. **Social security income.** Social security income includes social security pensions and survivors benefits, permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance, and railroad retirement insurance checks from the U.S. government. Medicare reimbursements are not included.
5. **Supplemental Security Income (SSI).** Supplemental Security Income (SSI) is a nationwide U.S. assistance program administered by the Social Security Administration that guarantees a minimum level of income for needy aged, blind, or disabled individuals. The census questionnaire for Puerto Rico asked about the receipt of SSI; however, SSI is not a federally administered program in Puerto Rico. Therefore, it is probably not being interpreted by most respondents as the same as SSI in the United States. The only way a resident of Puerto Rico could have appropriately reported SSI would have been if they lived in the United States at any time during calendar year 1999 and received SSI.
6. **Public assistance income.** Public assistance income includes general assistance and Temporary Assistance to Needy Families (TANF). Separate payments received for hospital or other medical care (vendor payments) are excluded. This does not include Supplemental Security Income (SSI).
7. **Retirement income.** Retirement income includes: (1) retirement pensions and survivor benefits from a former employer; labor union; or federal, state, or local government; and the U.S. military; (2) income from workers' compensation; disability income from companies or unions; federal, state, or local government; and the U.S. military; (3) periodic receipts from annuities and insurance; and (4) regular income from IRA and KEOGH plans. This does not include social security income.
8. **All other income.** All other income includes unemployment compensation, Veterans' Administration (VA) payments, alimony and child support, contributions received periodically from people not living in the household, military family allotments, and other kinds of periodic income other than earnings.

Industry Codes (on pages 5 and 6)

[Reprinted from pages 1028-9 of sf3.pdf at http://www.census.gov/prod/cen2000/doc/sf3.pdf.](http://www.census.gov/prod/cen2000/doc/sf3.pdf)

The industry classification system used during Census 2000 was developed for the census and consists of 265 categories for employed people, classified into 14 major industry groups. From 1940 through 1990, the industrial classification has been based on the Standard Industrial Classification (SIC) Manual. The Census 2000 classification was developed from the 1997 North American Industry Classification System (NAICS) published by the Office of Management and Budget, Executive Office of the President. NAICS is an industry description system that groups establishments into industries based on the activities in which they are primarily engaged. The NAICS differs from most industry classifications because it is a supply-based, or production-oriented economic concept. Census data, which were collected from households, differ in detail and nature from those obtained from establishment surveys. Therefore, the census classification system, while defined in NAICS terms, cannot reflect the full detail in all categories.

NAICS shows a more detailed hierarchical structure than that used for Census 2000. The expansion from 11 divisions in the SIC to 20 sectors in the NAICS provides groupings that are meaningful and useful for economic analysis. Various statistical programs that previously sampled or published at the SIC levels face problems with the coverage for 20 sectors instead of 11 divisions. These programs requested an alternative aggregation structure for production purposes which was approved and issued by the Office of Management and Budget on May 15, 2001, in the clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use by U.S. Statistical Agencies." Several census data products will use the alternative aggregation, while others, such as Summary File 3 and Summary File 4, will use more detail.

Occupation (SOC)

The occupational classification system used during Census 2000 consists of 509 specific occupational categories for employed people arranged into 23 major occupational groups. This classification was developed based on the Standard Occupational Classification (SOC) Manual: 2000, which includes a hierarchical structure showing 23 major occupational groups divided into 96 minor groups, 449 broad groups, and 821 detailed occupations. For Census 2000, tabulations with occupation as the primary characteristic present several levels of occupational detail.

Some occupation groups are related closely to certain industries. Operators of transportation equipment, farm operators and workers, and healthcare providers account for major portions of their respective industries of transportation, agriculture, and health care. However, the industry categories include people in other occupations. For example, people employed in agriculture include truck drivers and bookkeepers; people employed in the transportation industry include mechanics, freight handlers, and payroll clerks; and people employed in the health care industry include occupations such as security guard and secretary.
